

Customs Interactive Event History enhancements

Following this update IAG issue number 320 will be closed.

Users will be able to access new Customs Interactive screens listing the related events for specific documents. There are different levels of access available to users for event history information.

The levels are 'UNRESTRICTED' and 'RESTRICTED TO DOCUMENT OWNER.'

1. Unrestricted – Event History information only

The Import Document Status Summary View screen has been enhanced to provide access to Cargo Report and Underbond event history information when a particular cargo line is selected.

This search will allow a user who is not the document owner, to view the Import Document Status Summary View Screen, via the status hyperlink available on the Sea or Air Cargo Manifest List screens. The Document Status Summary View screen has been enhanced to allow clients to view the Event History for the associated Cargo Report(s) and Underbond(s) for that particular line of cargo.

Notes: If a user accesses the Event History screens using this method they will not be able to view the actual document but rather be taken directly to the Event History screen.

To view Cargo Report and Underbond Event History screens from the diagnostics search facility see below. – Sea cargo is being used for this example.

Once the relevant information has been retrieved then click the "Status" link to view the Import Document Status Summary View screen.

The screenshot displays the 'Sea Cargo Manifest List' web application. The interface includes a search criteria section with fields for Container No (1EVENHISTORY), Vessel ID, Vessel Name, Ocean Bill, House Bill, Voyage No, and Reported Between (10 AUG 2008 to 10 SEP 2008). Below the search criteria is a search results table with the following columns: Vessel ID, Voyage No, Container No, Ocean Bill, House Bill, Cargo Type, Disch Port Code, Frt Ind, U/B, Dec, and Status. The table contains one row with the following data: Vessel ID 8875085, Voyage No 909, Container No 1EVENHISTORY, Ocean Bill 1EVENHISTORY, House Bill, Cargo Type FCL, Disch Port Code AUSYD, Frt Ind Y, U/B Y, Dec Y, and Status CLEAR. The 'CLEAR' link in the Status column is circled in red. The page also features a navigation menu on the left and a footer with 'Prev Page Next' and 'Refresh Current Page' buttons.

2. Unrestricted – All document information

External ICS clients can already view Impending Arrival and Actual Arrival documents, clients will now have access to the Event History of these documents:

- Impending Arrival Reports (air and sea) via the Impending Arrival Report search menu
- Actual Arrival Reports (air and sea) via the Actual Arrival Report search menu

Sea Impending Arrival example

Select the Event History hyperlink and the Sea Impending Arrival Event History View screen will be displayed.

Sea Impending Arrival Event History View screen

3. Restricted to Document Owner

Other ICS documents have also been enhanced to allow users to access Event History information. Event history will be restricted to the document owner and can be accessed via a new hyperlink (for each document) which will take the user directly to the event history screen.

The following documents have event history available:

Cargo Documents:

- Cargo reports (air and sea)
- Underbond Movements (air and sea)
- Outturns (air and Sea)
- Cargo List Report
- Progressive Discharge Report

Import Documents:

- Import Declarations – including Self Assessed Clearances and UPE's
- S71E Movement Applications (air and sea)

Export Documents:

- Depot Receival Notice
- Depot Release Notice
- Warehouse Release Notice
- Warehouse Return Notice
- CTO Receival Notice
- CTO removal Notice
- Sub Manifest Report
- Departure Report
- Main Manifest Report
- Export Declarations

Note

Brokers will also be able to view the event history screens of the Cargo Report/s and Underbond/s related to the unique cargo line quoted on an import declaration. These screens can be accessed via the Import Declaration Status Summary screen which is searchable from the Declaration or the Manifest List Search Facility (as described above). Two new hyperlinks are now added to this screen which will take the user directly to the relevant Event History screens.
